

This is a statement from I, Raymond J. Bergeron-Davila and I state the following:

I have a speaker box located in my cell. This speaker box gives me and the bubble officer communication as all cells have this speaker box/intercom. On 8/9/14 the bubble officer clicked in on my speaker and promised to let me out of the hole if I made false statements or to act a certain way in front of the camera they wear. He said it would help them and in return (the inmate) me, would be let out of the hole.

end of statement
