

DR. ALLEN:

7-6-16

1. If I die as a result of my hunger strike, the security at GBCI will be significantly adversely affected. It will be adversely affected because we expect HSC staff to exercise prudent action to protect our health safety and welfare.

The failure of HSC staff to take life saving actions and allowing me to die (like Flores) while in custody will destabilize the corrections population. It will also do so because it jeopardizes the reliance on HSC staff to act in our best interests.

2. DR. ALLEN, to allow me to die by self-imposed starvation will give rise to rumors that HSC staff mistreated the dead (Tommye Center), thus causing my death. I am naturally suspicious of all white people and staff that work for the D.O.C and seldom know all of the information about an incident such as Tommye Center's death and so believe the worst.

3. DR. ALLEN, why haven't you contacted the office of legal council and obtained a court order to force feed me? Why are you intentionally assisting my (death) suicide?

4. DR. ALLEN, you have deliberately refused to treat me, even though, I have ~~and~~ continue to refused food and water longer than deemed reasonable by the Bureau of Health Services.

5. HSC staff has failed to prepare incident reports or provide daily reports to the warden, deputy warden, security director or chief legal office of the DOC.

GBCI-HSU

6. DR. Allen, All laboratory tests performed on my crew has showed, blood, pretern, ketones, and dehydration, which has significantly imperilled my health. But you still continue to assist in my suicide.

7. DR. Allen, I am still severely malnourished and dehydrated, suffering from headaches, dizziness, muscle weakness, heart palpitation, intense chest pain, difficult breathing, incontinence, vomiting blood, and an inability to stand for long periods of time.

8. DR. Allen, why wasn't an EKG ^{been} done on me?

9. DR. Allen, Hsu never go to line vs: "I am encouraged to eat and drink to maintain my health." It's almost been a month since I have not been eating or drinking water, except when I take my medication and the water is a very small amount.

10. DR. Allen, I can always locate the arteries in my arms, cut my legs and neck again, to force you into a positive to save my life. Trust me it's not an easy task to get me out the cell willingly. So you have a decision to make, are you going to address all of my medical issues or continue to play stupid as you have always done?!

NOTE I have been on my hunger strike since June 17, 2016 to present
