

I'm going to wait until Friday to mail this out the weekend staff don't usually mess with the mail. Thanks again. God Bless you and your friends. 9-20-

Peggy.

I thank you again for the envelopes. I think you inspired me to try and help in the Black Lives Mat. movement. Please review enclosed document.

I was hoping you and your 4 friends can put on the internet. This latest shooting of the guy the middle of the road convinced me using your envelopes for this cause was worth it.

That lady cop could have shot him in the leg he refused to stop after the third order. There no reason to kill him, they all shoot to kill.

If you guy can get this movement start a Law or group may take it up to the co. Making the Logo Main first a Law if they a chance to main, but instead end up killing person the new law or State wide awareness this new option will give every one another leg to stand on when their love ones shot.

The cops have to be forced to think not just react and if enough people in the States argue could have been mained the States will be forced create a main first law.

Sure not all situations will have time to, but it would end unarmed shootings totally.

With love in Christ
Mike M.
