Dear Peggy:

Get ready, cause here they come again. Check this out? Stanley Correctional Institution has installed a new computer program that serves as a collection Agency to Forward after they collect all debts that an inmates ever owed. The main thing wrong with this picture is, its taken inmates funds that goes back for decades and making them paid debts that have already been paid back in full.

Right now, you have a lot of people complaining to the immediate staff and such other. The natives are getting restless. Its like sharks in the water? When these sharks smell - sense - or whatever way they detect blood in the water they go in a frenzy and want to eat something up?

But before I go any further, let me inquire as to your health & well being? How are you and Ron doing? I think you can add this to that list of problem with the D.O.C. At least from Stanley's perspective the people here at SCI has implemented a computer program device to literally unlawfully transfer prisoners' finances to the state - counties that they don't owe anymore? It amounts to stealing, a form of computer theft, computer fraud. All of these elements make up a crime of high proportions, or could be, depending on if the D.O.C. is running this computer program not to collect old debts but to compel inmates to pay again debts that have already been paid. At any rate, its a mess.

Last but not least, You take care and let me know what if anything you learn on this matter from others.

P.S. Did get & enjoy last newsletter. 😊 LOVE Robert.
