

ICCR204 Wisconsin Department of Corrections Bureau of Classification and Movement	INMATE CLASSIFICATION REPORT Re-Classification	PAGE6
Name SCHROEDER, RONALD	DOC# 528682	Hearing Date 06/30/2016

Committee Comments

A COMPAS assessment was completed. The COMPAS is an actuarial assessment tool which has been validated on a Wisconsin norming population. It predicts the general likelihood that those with a similar history of offending are either less likely or more likely to commit another crime generally within the two years period following release from custody. The COMPAS assessment does not attempt to predict specifically the likelihood that an offender will commit a certain type of offense within the same two year period, nor does it designate external classification inmate custody. In addition to identifying general levels of risk to re-offend, COMPAS also identifies criminogenic needs specific to that inmate which are most likely to affect future criminal behavior.

COMPAS Risk Scores:

Violent Recidivism Risk: LOW

General Recidivism Risk: LOW

Supervision Recommendation- COMPAS Risk Level Recommendation Score: LOW

This review was conducted pursuant to Wisconsin Administrative Code 302, and addresses custody, site placement
