

This action Begins in January of 2014 when a lone male-mid-50w-confined to a wheel chair-was sent to RGCI due to RGCI being "better suited for his needs". Since arrival, this man has been held in the same seg cell on seg/intake unit through today's date. NO open windows, no sunlight , no fresh air.

During his stay here his ICON toilet has malfunctioned daily and ne has to wait till a CO can reset it. sometimes hours pass, sometimes a day till plumber comes. HE has bowel problems due to spinal injury and has to use a gloved finger in his own rear end to get the poop moving and then his toilet don't work!

He has begged to be moved and they don't do it. His segregation is due to his need for a wet cell. He isn't in trouble but is isolate solely die to it be only unit with wet cells! 5 years of this!

They continually deny transfer, library time is restricted, he can form NO relationships with other men because all of them get moved off unit every week. Health is failing and his ADA needs are not being met.!

His issues are administratively exhausted and ready for court. Due to retaliation fears we are not naming the prisoner victim or helping litigator here but can assure you that this effort is literally his last hope of making things better for him and all ADA similarly situated men in DOC facilities.
