

3 24 20/just got off phone with a 19 year old in WCI-he said we wouldn't believe what's going on. (oh yah?) I will sum as best I can: They are on limited lock in- out for showers only and that is everyone together . There are signs "covid" on some doors and Ryan asked what that was and Guard said - they have symptoms but not confirmed. Ryan said they shower with everyone also. He saw a bunch of staff (commotion in the hall) guys take someone to the hospital and they told him (a nurse and guard) that he had the flu.

They are given a sanitizer of some sort once a day to clean their rooms- this is new-

Soap is given out at least in general- it is unwrapped and has been used much = inmates complain (before the virus) that it turns the water filthy. A prisoner from CCI called yesterday who will send samples (packages probably) of what they get in seg. Ryan has his own soap also- many do, many don't.

He sees no gloves or protective gear on staff and incredulously tells me the staff are spreading the virus- - we worried about the phone- back and forth person to person- will ask Ron how to put our phone on blast so they can call me and speak from a distance. He said he will write and keep me updated.
