ELPIDIO JUAREZ (120590) Virus

First time sending you anything, and my reason for this is to inform you as to what Redgranite Correctional Institution (RGCI) has been doing regarding the Corona Virus.

As of March 20, 2020, RGCI has been enforcing what the CDC has ordered the public to do, and that is "Social Distancing", however, we feel that this administration has made a mockery of the whole ordeal; Simply because the virus is not here, and the only way we can get it is if, one of these staff members bring it in. Which me to the concerns most if not all prisoners are:

- 1) What measures are in place for staff, before they walk into these prisons? Everyone is being told to act as if they have the virus, so it would be ideal for the offices to wear masks while working. In an ordinary situation, this would be overkill, but as we all know, this is no ordinary situation. Our lives depend on the officers' actions
- 2) There has been little to no disinfecting of any of the Housing Units on a continues bases
- 3) The ventilation system has no extra protections or special filters during these times.
- 4) Who will be held accountable if one us (prisoner) happens to get sick and it is "Corona virus?" Like I said, currently the only individuals capable of getting us sick are the prison staff.
