

Earned Beamon Jr 442523 ABC1

Peggy,

8/17/20

Hope that you are well once this letter reaches your hands and eyes. I'm just gone get straight to the point. The way that Green Bay Corr. is handling this Covid-19 virus situation is sickening and any decent human being would be disgusted with what they see if they were to walk thru this Gouth cell Hall.

We have been on lockdown for over a week now because three people that are on the Game tier as me had Covid-19. These three people were not put into quarantine and are still on the tier with us and are allowed to come out of their cells along with the rest of us and now what started with three is now over ten people sick and there's going to be even more. Because the sick are allowed to come out for med passes and anything else.

Our cells have open fronts. So we are not safe. These inmates were exposed to staff members who were sick. And staff still walk around here with their face mask pulled down past their chins and some don't even wear masks they have a spit shield over their face that only blocks out spit nothing else. And they all complain about having to wear

Mask. When they are the ones that leave out of here everyday and come back in here with all types of particles from the free world on their clothes. And then have the Nerve to say "IF we got to wear the mask then Go do y'all." They don't really have us wearing the mask for our own safety? It's more for punishment. Because Go many inmates have written them up for not wearing mask.

They could care less about our health or safety. As you can see they have us moving around with the Gick. Yesterday on 8/16/20 First Shift Sgt. was handing out cookies with his hands after he touched ~~his~~ his keys and the traps. Just plain nasty and then got upset because I told him that we are not animals ~~and~~ and I'm not eating nothing from his nasty ass hands.

This is absolutely unacceptable and totally unsafe and unhealthy.

P.G.

Respectfully,

EARNEST BEAMON JR.

You have my permission to do whatever you need

to do. Because I do not want to get Gick and this is falling under "Failure to protect" and "Failure to protect"
