

\*CORONA VIRUS OUTBREAK AT GREENBAY CORRECTIONAL INSTITUTION\*

On August 9th 2020 at the PM hours on the South-Cell-Hall of the prison the Covid struck, not by the prisoner but by the staff that are suppose to keep us all safe in here but failed to do even that by bringing in the Virus that is causing DEATH!

So I Matthew McAfee #444947

G.B.C.I.  
P.O. Box 19033  
GreenBay, WI 54307-9033

Was coming back from rec., when they told us to lock in. Little did I know that the Covid had already begun to start on the South Cell Hall of this prison. Not until the next day from an insider that i have gain my information of that the first case has begun, and it was brought in by the staff. The protocols set in place to protect us the prisoners have been over looked due to staff being lazy. There is no other way for this Virus to gain access into this prison with the shut down of all contact with the outside. It is sad that staff is putting the lives of the innocent like us the prisoners at risk for their lack of job responsibilities. Further-more there has been many staff member's that joked about bringing in the Virus to infect as many of us as they can, another way to extend their "Crule and Unusal Punishment" against us without the outside eye to know the truth behind the actions taken against us in here. Which i have many story's to share of the amount of evil they've conduct in here since 2009 when I was placed here.

So Lock-down of the prison was set in motion. This is an attempt to stop the spread. The individual was taken to the treatment center a room to be placed in while the tests are going to make sure he is positive, and his celly taken as a back up to stop the spread if he too is infected.

Three days later it is August 12th 2020, they (STAFF) Did not stop the spread. Instead 27 more cases have popped up in those 3 days since the first prisoner has been struck with the Virus. Is this because of the prisoner interacting with one another? NO! We as prisoners have already been forced with social distancing by means of having us on very strict movement to nearly none at all. for 24/7 we been locked down in our cells with only movements to rec 2 times a week, to showers 3 times a week and to the Kiosk

1948  
The first part of the report deals with the general situation in the country and the progress of the work during the year. It then goes on to discuss the various projects and the results achieved. The second part of the report deals with the financial aspects of the work and the budget for the next year. The third part of the report deals with the administrative aspects of the work and the personnel involved. The fourth part of the report deals with the conclusions and recommendations of the committee.

The committee has been pleased to see the progress made during the year and the results achieved. It has also been pleased to see the financial aspects of the work and the budget for the next year. The committee has also been pleased to see the administrative aspects of the work and the personnel involved. The committee has also been pleased to see the conclusions and recommendations of the committee.

2 times a week. Now that might seem like alot but it's not when in the time spent at thopse areas are as follows; Rec 45 mins, showers 6mins, Kiosk 5 mins. that is the time we are allotted to be in that area and time to have there. Now most of these are over-lapping times with one another. Like we'll have Kiosk and rec same day, showers and Kiosk same day, so all in reality we are only let out of our cell for a max of 2 hours and 3 minutes. in a whole week that is, before the out break too. Now we haven't been to showers in 8 days and still there is no word if we will be able to get clean. Not until the 9th day when finally they allowed us to go to showers, and that was the first time we were let out of our cells, all in an effort to stop the spread but it is still spreading in the South and will continue until the staff are forced into more extreme measures in testing before they are aloud in the prison. They are killing us for we are forced to stay here we can not jsut get up and leave to a safe place thus they atre getting away with murder and it's not the first time I seen them get away with it.

Well 4 more days have gone by and still no more showers have gone on. the prisoners are getting wild and crazy for they want to bathe and be clean but staff still refuses to allow us our mandotory showers that we are allowed by law to be clean in a weeks time. Still the Virus sprads there is no stopping it on the south that is our ground zero. It is contain over there as long as the staff that work over there stay over there, but that is not the case a Sgt Llynole don't know his spelling of his name but it sounds like annoy with a L at the beginning. Well i see this Sgt. obver on the North Cell hall unit playing on the computer joking with his fellow staff members saying that it crazy over there and he is laughing stating "I hope all those FUCKERS! get it good riddings to erasing the scum of society." Now does this sound like someone who cares for our safety? I say NO!, but this is what we have to deal with as prisoners that our voices are cut off from the world that we are desprately trying to get back to any way that we can. You don't understand what we as prisoners have to go through everyday, no#t just with ourselves, other prisoners but the staff that are suppose to protect us but we have to protect ourselves from them.
