

The way a human is treated in segregation part 1

The way a human is made to live in the hole (segregation) is inhumane. The way of everything is just wrong and before I just unlaod a bunch of facts i will start off with the way we are made to eat.

We are forced to eat with these paper sponns as indicated in the photo included in this blog. Now why are we forced to eat with these paper spoons or if were lucky a rubber sponn that can not hold anything or even pick up the food. It is because of the treatmernt of the prisoner by staff, it is badf enough that we are taken away from everyone and everything that we own and forced to be subjected to nothing but nosie, isolation, and madness. There are many things put in place that allow us a little freedom from the madness that we are deemed to endour. But that is not always being done while your staying in the hole.

So again i say why are we forced in eating with paper spoons. that is because of the mental and physical abuse that we are being treated with day in and day out from 3 different shifts from staff that most want to see how far they can go in making someone snap for to them it is boaring enough to watch inmates behind locked doors 24/7 and siting around doing nothing for 8 hours gets to the guards so they staff start up shit with us to make us snap on eachother down in the hole or on them so they staff can use physical force against us or make our stay in the hole a more remeberal one. Which I will get into in the other parts to this . But one day a prisoner had enough of the inhumane treatment towards himself and he sharpened his spoon a plastic one like you'd use at cook outs, or for a small child or baby, on a picni what every. With that newly sharpened spoon he cut himself over and over to get the attention of a Captain to talk to to show that he was being mistreated but nobody would listen. Now this inmate went in for maybe a loud ~~radio~~ radio but is now leaving with self/multalation on his records and with a new Mental health (MH) level and on medications that he never needed before. That is why we have to eat with paper spoons because of the treatment by staff. So to stop further harm towards any other that might do the same we are giving paper spoons that is impossible to eat with.
