

Peg,

9/6/20

I received your letter here at Racine Corr Inst where I'm housed until my release date March 2nd, 2021. I've contracted covid-19 due to the staff here on Washington unit taking my room mate Charlie Riser to the hospital on 8/18/20 after 9:30 pm then brought Charlie Riser back to the room 8/19/20 a little after 2:30 AM. Around 10 AM on 8/19/20 2 white shirts escorted me to Green west where people are on quarantine for 14 days, the doctors said I had to wait 10 days before getting the test which I was placed in a cell by myself from 8/19/20 until 9/3/20.

With all I informed you about with me testing positive after staff took my room mate off grounds and brought him back in the room with me and the staff is suppose to take him straight to Green west for a 14 day quarantine. I know your super busy, I'm asking you to forward this information to someone that could help me please. Thank you very much Cornelius

One more thing to inform you about staff
don't wear their mask at all or if they do
get it on it's not covering their nose or
mouth.

Armonio Cornelius.
